

TOAD[®] **security**

Innovative car security

Toad Security has led the way in innovative car security design since its launch in 1994. Our latest range of alarm and immobiliser systems continues that tradition. We offer the latest insurance approved technology to help protect your vehicle.

Built to the most exacting European standards and featuring all the convenience features you requested, the Toad range sets new standards in car security.

Choosing your system

Is your vehicle fitted with a manufacturer's immobiliser? No

Insurance approved vehicle security systems

Ai606

Thatcham Category 1

A high specification vehicle alarm and enhancement system with full Thatcham Category 1 status.

A comprehensive range of security features including door, bonnet and boot protection, ultrasonic interior protection, 2 circuit immobilisation, a self powered siren and distress alert. Complemented by many convenient enhancements including remote control central locking, system override, headlight operation and vehicle dependent window and sunroof close.

Serious vehicle protection

A850 T

Thatcham Category 2:1 Enhancement

Many new vehicles are fitted with an insurance approved immobiliser and operate their remote central locking using an infra- red or RF transmitter.

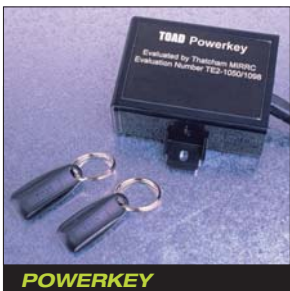

The Toad A850 T enhancement system uses the original transmitter and upgrades the immobiliser to a full Thatcham Category 1 (Issue 2) alarm system with all the security and convenience features you would expect.

Serious vehicle protection

POWERKEY

Thatcham Category 2

A “keyless”, high security insurance approved immobiliser, using the latest transponder technology in the fight against vehicle crime.

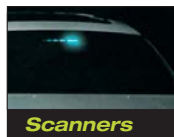

The ultimate in user friendly vehicle protection. It automatically arms when you remove your ignition keys and disarms when you insert them. Programmable keys and status LED complete the features.

Scanners

The art of visual theft deterrence

High visibility LEDs and electroluminescent strips add personality and visual deterrent to your security system.

Our comprehensive range of scanners, including Gothic, Aero, Stealth and Alien imply a vehicle bristling with security and our wide choice of colours and styles allows you to customise your vehicle and personalise your security.

What is Thatcham approval?

The insurance industry recognises the following Thatcham approved categories of electronic vehicle security:

Alarm and Immobiliser Systems

Immobiliser Systems

Existing Cat 2 Immobilisers upgraded to Cat 1 Systems

The new Issue 2 testing standards introduced by Thatcham were implemented in October 1998. Has the system you are proposing to buy exceeded these standards? All our Thatcham approved alarms and immobilisers have!

Alarm systems

A51 S

Vehicle Alarm System

A remote controlled modular vehicle alarm system offering a wide range of features at an excellent price. Features include 2 advanced RF transmitters, door, bonnet and boot protection, ultrasonic interior protection, immobilisation, panic alert, status LED, micro siren, flashing indicators and much more.

A101 CL

Vehicle Alarm and Remote Central Locking System

A high specification, advanced vehicle alarm system with added convenience and enhancement features. Security features are as the A51 S with the added convenience of full remote control central locking and vehicle dependent selective locking which enables the driver to only unlock the driver's door for added personal security.

A201 TC

Vehicle Alarm Remote Central Locking and Enhancement System

A comprehensive vehicle alarm system with all the features of A51 S and A101 CL with the optional added enhancement of vehicle dependent remote control window/sunroof closure and headlamp illumination.

A truly flexible and complete vehicle protection and enhancement control system to suit you and your vehicle.

A850

Alarm Enhancement System

Many new vehicles are fitted with an immobiliser and operate their remote central locking using an infra-red or RF transmitter.

The A850 system will, by using the original transmitter, upgrade the immobiliser to an alarm system with all the security and convenience features you would expect, without the need for additional keys.
